Welcome to Poetry of Resistance!

Poetry of Resistance is a project by Cais 1515 - Associação Cultural, in partnership with Eurosud, Globers and IRMI, co-financed by the European Commission under the CERV (Citizens, Equality, Rights and Values) program, which aims to promote European memory and the active participation of young people, through culture and the arts, in the role played by artistic resistance movements in combating the dictatorships of the 20th century.

We believe that preserving the memory of artistic resistance movements in Europe can be an effective and attractive way of involving young people in civic life, creating opportunities for new democratic achievements based on common European history.

About the Exhibit

This exhibition was put together by the project's international partners and other civil society participants who are implementing Poetry of Resistance, under the coordination of Cais 1515 - Associação Cultural and its project partners. The teachers and trainers who have joined the Poetry of Resistance project have been an invaluable help in constructing the results on display, which you can now enjoy.

This exhibition is part of Work Package 4 and aims to show the first results obtained by the participants. The works on display in this first exhibition are a summary of the implementation of Work Package 1, at local and international level, developed by all the partners in this project supported by the European Commission.

We have therefore chosen to present the main data on the autocratic regimes that prevailed in Portugal, Spain, Germany and Italy and the main players in the artistic resistance movements in these countries. At the same time, we also invite you to take part in this exhibition, through a few moments in which you can say what resistance means to you and what it was like to live under a dictatorship, sharing your own experiences or those of family members.

Para este primeiro momento público do Poesia da Resistência quisemos abrir o apetite sobre o que pode esperar do projeto, ao mesmo tempo que contamos com que cada vez mais indivíduos da sociedade civil se possam juntar a nós, ao longo dos próximos três pacotes de trabalho.

For this first public moment of Poetry of Resistance, we wanted to whet your appetite about what you can expect from the project, while at the same time hoping that more and more individuals from civil society will be able to join us over the next three work packages.

Work Packages

WORK PACKAGE 1
Research and Reflect

WORK PACKAGE 2
Digital Content Creation

WORK PACKAGE 3
Capacity Building

WORK PACKAGE 4
Awareness Raising Local Events

WORK PACKAGE 5
Transnational Event
